Summary

An Informatics graduate from Universitas AMIKOM Yogyakarta with a strong enthusiasm for web development and a growing interest in data engineering and database management. Eager to deepen technical expertise, explore new technologies, and build efficient, scalable web applications and data solutions. A motivated fast learner with strong problem-solving skills and a commitment to continuous learning.

Education

- **Vocational High School - SMK Telkom Malang** 2017 – 2020
- **Bachelor's Degree Informatics (GPA: 3.81) - Universitas Amikom Yogyakarta** 2022 – 2026

Portfolio

- dhika-portofolio.vercel.app

Areas Of Experties

- Website Development
- Data Analytics
- UI/UX

Projects

Image-based classification of chicken diseases Individual

Developed an image-based chicken disease classification system using Vision Transformers (ViT) and CLAHE for image enhancement. Built a web-based application using React.js, Vite, and Tailwind CSS for the frontend, with FastAPI as the backend to process images and deliver classification results.

- GitHub
- Demo

Marketplace PasarKita Individual

Developed the frontend of PasarKita, a marketplace web application, using React.js, Vite, and Tailwind CSS. Designed responsive user interfaces and reusable components to provide a user-friendly shopping experience, including product listings, product details, and navigation between pages.

- GitHub
- Demo

Digital Compressor Website Individual

Developed Digital Compressor, a web application for compressing images and videos to reduce file sizes efficiently. Built with React.js, Vite, and Tailwind CSS for the frontend, and Express.js for the backend. Implemented Multer with disk storage for temporary file uploads and processing.

- GitHub
- Demo

UI/UX Hospitality System Dhihid Hotel Collaboratif

Designed the UI/UX for Dhihid Hotel, a hospitality management system, focusing on an intuitive user interface, seamless navigation, and a user-friendly experience. Created interface layouts and user flows to simplify hotel management operations and improve usability across the system.
